

VITAFIT · PRD REVIEW

VitaFit Together

Two features that turn solo, on-demand workouts into a shared habit

Squads

Instructor Circles

01 · THE PROBLEM

Users want to be fit, but they don't stay

3%

of health and fitness app users
are still active on Day 30

11%

of Indian gym members stay
regular beyond six months

37%

of Indians actually exercise,
though 46% call health their
top priority

Demand isn't the issue: India's fitness app market is **USD 521M**, growing **18.7% a year**. Retention is. Every user who drifts away must be paid for again.

Two reasons users drift away

Drop in motivation

- They work out alone
- Progress is hard to see
- Skipping a day costs nothing

Fix: peer accountability → Squads

No instructor connection

- On-demand video is one-way
- The instructor doesn't know them
- No reason to return to one person

Fix: a real relationship → Instructor Circles

What the data tells us to build

Insight	What we build
42% of exercisers work out 30 min or less	10-minute classes count toward streaks
Lack of time is the #1 barrier (31%)	Squads matched by time slot
57% of women inactive vs 42% of men	Women-only Squads, home-first
57% of urban users prefer regional language	Circles in Hindi, Kannada, Tamil, Telugu
7-day streak users return 2.4x more	Shared Squad streak with a weekly freeze
App-only Peloton users churn 3x faster	Instructor loyalty as emotional lock-in

04 · FEATURE 1 · MOTIVATION

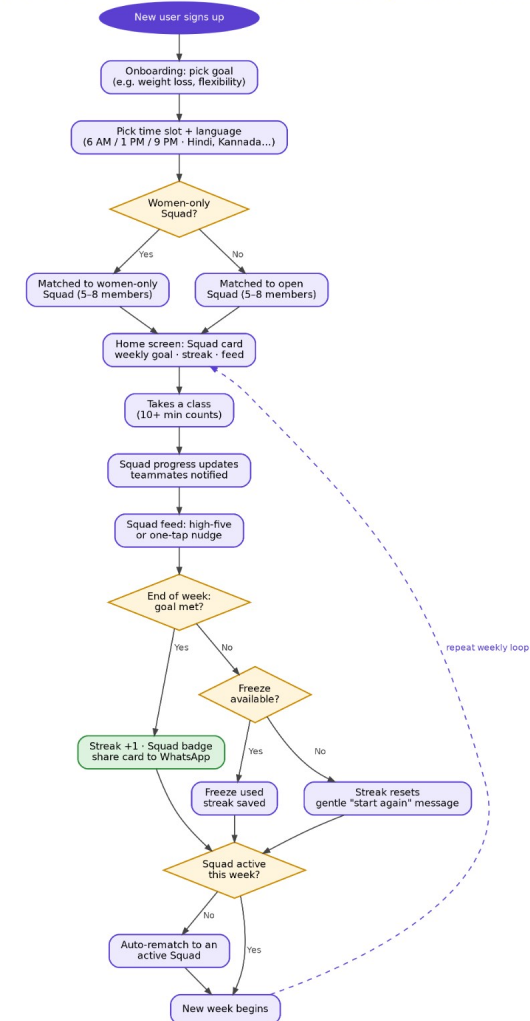

Squads: small groups that keep you showing up

Users are matched into a Squad of 5–8 people by goal, time slot and language. Every class they finish moves the Squad's shared weekly goal.

- **Shared weekly goal** with a progress bar
- **Squad streak** with one freeze a week
- **High-fives and one-tap nudges** in a light feed
- **Auto-rematch** if a Squad goes quiet for 7 days

Built for India: 6 AM / 1 PM / 9 PM slots · women-only Squads · WhatsApp share cards

Core Flow 1: Squads (motivation through accountability)

05 · FEATURE 2 · CONNECTION

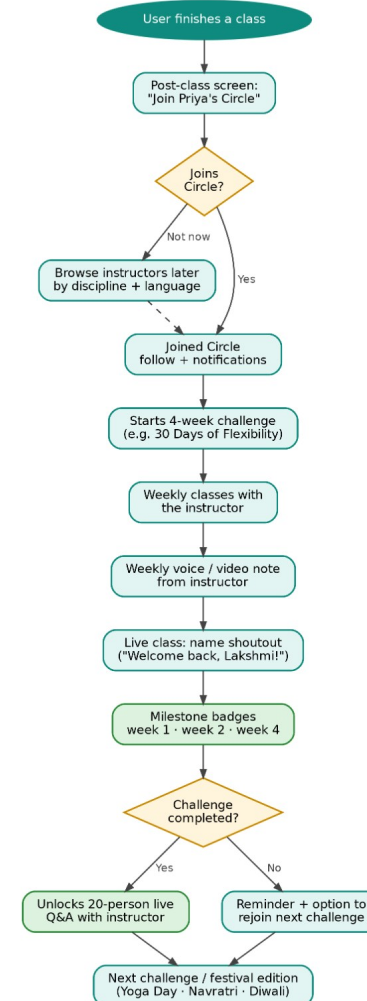

Instructor Circles: be known by name

Users follow an instructor and join their Circle. Each instructor runs a 4-week themed challenge that turns one-way video into a relationship.

- **Join from the post-class screen**, browse by language
- **Badges** at weeks 1, 2 and 4
- **Live name shoutouts** and weekly voice notes
- **Finishers unlock** a 20-person live Q&A

Built for India: regional-language instructors · Yoga Day, Navratri and Diwali challenges

Core Flow 2: Instructor Circles (personal connection)

How we'll know it worked

NORTH STAR

Weekly Active Exercisers

Users completing 2+ classes a week

Metric	Today*	Target
Day-30 retention	8%	12%
Classes / user / week	1.4	2.0
Repeat users (4+ weeks)	18%	25%

Top risks and guardrails

Squads go quiet

Auto-rematch after 7 quiet days

Comparison hurts wellbeing

No global leaderboards; private stats

Instructor bandwidth

Templated notes; 2-hour weekly cap

*Assumed baselines, to be replaced with VitaFit data. Guardrails: notification opt-outs +2 pts max · Squad leave/report rate under 5%

Test small, prove it, then scale

Weeks 1–6

Validate

15 interviews, wireframes,
prototype tests

Weeks 7–11

MVP beta

500 users, 5 instructors

Weeks 12–20

A/B test

4 groups, 5 cities, 8 weeks

Week 22+

Scale

Winner to all users; festival
challenges

OUR ASK

Approve a 5–person team for 20 weeks, 5 instructors for the beta, and access to baseline retention data.

PRD at a glance

Section	Summary
Project	VitaFit Together: turn solo, on-demand workouts into a shared habit
Description	Two features: Squads (peer accountability) and Instructor Circles (connection)
Problem	Users drift away within weeks: motivation fades and instructors feel distant
Why	3% Day-30 retention in fitness apps; only 11% of Indian gym members stay regular
Success	North Star: Weekly Active Exercisers; Day-30 retention from 8% to 12%*
Audience	Urban professionals aged 22–40 in their first 60 days; women at home a priority
What	A new Together tab, plus touchpoints at onboarding, post-class and home
How	MVP beta, then a 4-group A/B test on new users in 5 cities for 8 weeks
When	Beta in week 10, test readout in week 20, scale from week 22

Who we're building for

Segment	Who they are	Core need
Primary: time-poor professionals	22–40, metro cities, mostly Android	Short workouts and someone to keep them on track
Priority: women at home	25–45, working or homemakers	Safe, flexible, women-only spaces
Secondary: Gen Z	18–24, students, early-career	Belonging and something to share

Ashwini, 36

Scrum Master, Bengaluru. Did 6 classes, then work got busy. Wants 6:30 AM yoga in Kannada.

Nishant, 32

Sales executive, Bangalore. Does 3 zumba classes a week but feels he's working out with a TV.

Nairmaliya, 20

College student, Bangalore. Joins challenges with friends and shares badges on WhatsApp.

Squads: requirements

Priority	Requirement
Must	Auto-match into a Squad of 5–8 by goal, time slot (6 AM, 1 PM, 9 PM) and language
Must	Shared weekly class goal with a progress bar
Must	Squad streak with 1 freeze per week; classes of 10+ minutes count
Must	Squad feed with high-fives and one-tap nudges
Must	Women-only Squad option
Should	Weekly Squad quest, e.g. "everyone tries a new discipline"
Should	Share Squad progress card to WhatsApp and Instagram
Should	Auto-rematch if a Squad is inactive for 7 days
Could	Invite friends to create a private Squad
Won't (v1)	Global public leaderboards

Instructor Circles: requirements

Priority	Requirement
Must	Follow an instructor and join their Circle from the post-class screen
Must	Browse instructors by discipline and language (Hindi, English, Kannada, Tamil, Telugu)
Must	4-week challenge with badges at weeks 1, 2 and 4
Must	Instructor dashboard showing Circle members in live classes, for shoutouts
Should	Weekly 30–60 second voice or video note to the Circle
Should	Challenge completers unlock a 20-person live Q&A class
Should	Festival challenges: Yoga Day (21 June), Navratri garba-zumba, Diwali 21-day
Could	A Squad takes a Circle challenge together
Won't (v1)	Paid 1:1 instructor sessions

Experiment plan

Hypotheses

H1 · Squads

Joining a Squad lifts Day-30 retention by 3+ points, because peer accountability replaces fading motivation.

H2 · Instructor Circles

Joining a Circle lifts repeat classes with that instructor by 40%, because a relationship gives a reason to return.

Test design · 8 weeks · 5 cities

Group	Gets	Share
Control	Current app	25%
A	Squads only	25%
B	Circles only	25%
C	Both features	25%

New users in Bengaluru, Mumbai, Delhi NCR, Pune and Hyderabad.
About 4,000 users per group to detect a 3-point Day-30 lift (to confirm with the data team).

Timeline and milestones

Weeks	Milestone	Output
1–2	Discovery	15 user interviews, baseline data, instructor feedback
3–4	Wireframes	Core flows for Squads and Instructor Circles
5–6	Prototype and tests	Clickable prototype tested with 10 users
7–10	MVP build	Both MVPs, instructor dashboard, analytics events
10–11	Beta	500 opt-in users; 5 instructors onboarded
12–20	A/B test	4-group test across 5 cities for 8 weeks
20–21	Readout	Results review; go or no-go to scale
22+	Scale	Full rollout; festival challenges for Navratri and Diwali

Team: 2 mobile engineers, 1 backend engineer, 1 designer and 1 PM.

Feature metrics and guardrails

Feature	Metric	Target
Squads	New users joining a Squad in week 1	35%
Squads	Squads hitting their weekly goal	50%
Squads	Squads with a 4+ week streak	30%
Circles	Users joining at least one Circle	30%
Circles	Challenge completion rate	25%
Circles	Repeat classes, same instructor	+40%
Both	Users trying 2+ disciplines a month	+20%

Guardrails

- Opt-outs rise 2 pts max
- Squad leave/report under 5%
- App rating and NPS hold
- Instructor time 2 hrs/week max

Open questions

- Real baseline retention?
- Instructors ready at launch?
- Squads for free users too?

Risks and mitigations

Risk	Mitigation
Squads go quiet	Auto-rematch after 7 inactive days; seed with 2+ active users
Comparison hurts wellbeing	No global leaderboards; Squad-level progress; private stats
Instructors lack time	Templated voice notes; live-class dashboard; 2-hour weekly cap
Streak pressure and burnout	Weekly freeze; 10-minute classes count; no penalties
Too many notifications	Capped at 1 a day, in the user's chosen time slot
Harassment in Squad feeds	Reactions and preset messages only in v1; report and block
